NI-9201 and sbRIO-9201 Specifications..... 3

NI-9201 and sbRIO-9201 Specifications

In this document, NI-9201 and sbRIO-9201 are referred to inclusively as NI-9201.

Connector Types

The NI-9201 has more than one connector type: NI-9201 with screw terminal, NI-9201 with spring terminal, and NI-9201 with DSUB. Unless the connector type is specified, NI-9201 refers to all connector types.

Definitions

Warranted specifications describe the performance of a model under stated operating conditions and are covered by the model warranty.

Characteristics describe values that are relevant to the use of the model under stated operating conditions but are not covered by the model warranty.

- **Typical** specifications describe the performance met by a majority of models.
- **Nominal** specifications describe an attribute that is based on design, conformance testing, or supplemental testing.

Specifications are **Typical** unless otherwise noted.

Conditions

Specifications are valid for the range -40 °C to 70 °C unless otherwise noted. All voltages are relative to COM unless otherwise noted.

Input Characteristics

Number of channels	8
ADC resolution	12 bits
Type of ADC	Successive approximation register (SAR)

Table 1. Sample Rate (Aggregate)

Mode	Maximum Sample Rate (R Series Expansion Chassis)	Maximum Sample Rate (All Other Chassis)
Single Channel	475 kS/s	800 kS/s
Scanning	475 kS/s	500 kS/s

Input range	± 10 V
Measurement voltage, channel-to-COM (V)	
Minimum	± 10.3
Typical	± 10.53
Maximum	± 10.8
Overvoltage protection, channel-to-COM	± 100 V

Table 2. NI-9201 Accuracy (Excludes Noise)

Measurement Conditions		Percent of Reading (Gain Error)	Percent of Range ¹ (Offset Error)
Calibrated	Typical (25 °C, ±5 °C)	±0.04%	±0.07%
	Maximum (-40 °C to 70 °C)	±0.25%	±0.25%
Uncalibrated ²	Typical (25 °C, ±5 °C)	±0.26%	±0.46%
	Maximum (-40 °C to 70 °C)	±0.67%	±1.25%

Stability	
Gain drift	±34 ppm/°C
Offset drift	±100 µV/°C
Input bandwidth (-3 dB)	690 kHz minimum
Input impedance	
Resistance	1 MΩ
Capacitance	5 pF
Input noise, code-centered	
RMS	0.7 LSB RMS

1. Range equals 10.53 V
2. Uncalibrated accuracy refers to the accuracy achieved when acquiring in raw or unscaled modes where the calibration constants stored in the module are not applied to the data.

Peak-to-peak	5 LSB
No missing codes	12 bits
DNL	-0.9 to 1.5 LSB
INL	± 1.5 LSB
Crosstalk, at 10 kHz	-75 dB
Settling time, to 1 LSB	2 μ s
MTBF	1,092,512 hours at 25 °C; Bellcore Issue 2, Method 1, Case 3, Limited Part Stress Method

Power Requirements

Power consumption from chassis	
Active mode	1 W maximum
Sleep mode	1 mW maximum
Thermal dissipation (at 70 °C)	
Active mode	1 W maximum

Sleep mode	32 mW maximum
------------	---------------

Physical Characteristics

Weight	
NI-9201 with screw terminal	165 g (5.8 oz)
NI-9201 with spring terminal	152 g (5.4 oz)
NI-9201 with DSUB	142 g (5.0 oz)
Dimensions	Visit ni.com/dimensions and search by module number.

NI-9201 with Screw Terminal Wiring

Gauge	0.2 mm ² to 2.5 mm ² (26 AWG to 14 AWG) copper conductor wire
Wire strip length	13 mm (0.51 in.) of insulation stripped from the end
Temperature rating	90 °C minimum
Torque for screw terminals	0.5 N · m to 0.6 N · m (4.4 lb · in. to 5.3 lb · in.)
Wires per screw	One wire per screw terminal; two wires per screw terminal using a 2-wire

terminal	ferrule
Ferrules	0.25 mm ² to 2.5 mm ²
Connector securement	
Securement type	Screw flanges provided
Torque for screw flanges	0.2 N · m (1.8 lb · in.)

NI-9201 with Spring Terminal Wiring

Gauge	0.2 mm ² to 2.5 mm ² (30 AWG to 12 AWG) copper conductor wire
Wire strip length	10 mm (0.39 in.) of insulation stripped from the end
Temperature rating	90 °C minimum
Wires per spring terminal	One wire per spring terminal; two wires per spring terminal using a 2-wire ferrule
Ferrules	0.25 mm ² to 2.5 mm ²
Connector securement	
Securement type	Screw flanges provided

Torque for screw flanges	0.2 N · m (1.8 lb · in.)
--------------------------	--------------------------

Environmental Characteristics

Temperature	
Operating	-40 °C to 70 °C
Storage	-40 °C to 85 °C
Humidity	
Operating	10% RH to 90% RH, noncondensing
Storage	5% RH to 95% RH, noncondensing
Ingress protection	IP40
Pollution Degree	2
Maximum altitude	2,000 m
Shock and Vibration	
Operating vibration	
Random	5 g RMS, 10 Hz to 500 Hz
Sinusoidal	5 g, 10 Hz to 500 Hz

Operating shock	30 g, 11 ms half sine; 50 g, 3 ms half sine; 18 shocks at 6 orientations
-----------------	--------------------------------------------------------------------------

To meet these shock and vibration specifications, you must panel mount the system.

NI-9201 with Screw Terminal and NI-9201 with Spring Terminal Safety Voltages

Connect only voltages that are within the following limits.

Channel-to-COM	± 60 V DC maximum
Channel-to-channel	None
Channel-to-earth ground	
Continuous	250 V RMS, Measurement Category II
Withstand	2,300 V RMS, verified by a 5 s dielectric withstand test

NI-9201 with DSUB Safety Voltages

Connect only voltages that are within the following limits.

Channel-to-COM	± 60 V DC maximum
Channel-to-channel	None
Channel-to-earth	

Continuous	60 V DC, Measurement Category I
Withstand	1,000 V RMS, verified by a 5 s dielectric withstand test

Measurement Category

Measurement Category I

Caution Do not connect the NI-9201 with DSUB to signals or use for measurements within Measurement Categories II, III, or IV.

Attention Ne pas connecter le NI-9201 with DSUB à des signaux dans les catégories de mesure II, III ou IV et ne pas l'utiliser pour effectuer des mesures dans ces catégories.

Warning Do not connect the NI-9201 with DSUB to signals or use for measurements within Measurement Categories II, III, or IV, or for measurements on MAINS circuits or on circuits derived from Overvoltage Category II, III, or IV which may have transient overvoltages above what the product can withstand. The product must not be connected to circuits that have a maximum voltage above the continuous working voltage, relative to earth or to other channels, or this could damage and defeat the insulation. The product can only withstand transients up to the transient overvoltage rating without breakdown or damage to the insulation. An analysis of the working voltages, loop impedances, temporary overvoltages, and transient overvoltages in the system must be conducted prior to making measurements.

Mise en garde Ne pas connecter le NI-9201 with DSUB à des signaux dans les catégories de mesure II, III ou IV et ne pas l'utiliser pour des mesures dans ces catégories, ou des mesures sur secteur ou sur des circuits dérivés de surtensions de catégorie II, III ou IV pouvant présenter des surtensions

transitoires supérieures à ce que le produit peut supporter. Le produit ne doit pas être raccordé à des circuits ayant une tension maximale supérieure à la tension de fonctionnement continu, par rapport à la terre ou à d'autres voies, sous peine d'endommager et de compromettre l'isolation. Le produit peut tomber en panne et son isolation risque d'être endommagée si les tensions transitoires dépassent la surtension transitoire nominale. Une analyse des tensions de fonctionnement, des impédances de boucle, des surtensions temporaires et des surtensions transitoires dans le système doit être effectuée avant de procéder à des mesures.

Measurement Category I is for measurements performed on circuits not directly connected to the electrical distribution system referred to as **MAINS** voltage. MAINS is a hazardous live electrical supply system that powers equipment. This category is for measurements of voltages from specially protected secondary circuits. Such voltage measurements include signal levels, special equipment, limited-energy parts of equipment, circuits powered by regulated low-voltage sources, and electronics.

Note Measurement Categories CAT I and CAT O are equivalent. These test and measurement circuits are for other circuits not intended for direct connection to the MAINS building installations of Measurement Categories CAT II, CAT III, or CAT IV.

Measurement Category II

Caution Do not connect the NI-9201 with screw terminal or NI-9201 with spring terminal to signals or use for measurements within Measurement Categories III or IV.

Attention Ne pas connecter le NI-9201 with screw terminal ou NI-9201 with spring terminal à des signaux dans les catégories de mesure III ou IV et ne pas l'utiliser pour effectuer des mesures dans ces catégories.

Measurement Category II is for measurements performed on circuits directly connected to the electrical distribution system. This category refers to local-level electrical distribution, such as that provided by a standard wall outlet, for example,

115 V for U.S. or 230 V for Europe.

Calibration

You can obtain the calibration certificate and information about calibration services for the NI-9201 at ni.com/calibration.

Calibration interval	1 year
